SAATHI CENTRE

INSTITUTE OF SOCIAL STUDIES TRUST

POLICE STATION KALYANPURI

DELHI-110091

Acknowledgment

I have no doubt that the positive progress made through the sincere and hands-on efforts of our funders, field workers, volunteers, communities of domestic workers, youth and children of saathi centre will endure as a lasting impact, shining a light of hope in the darkness and opening the way to a brighter future. In his famous "Democracy and Education" Dewey(1916) wrote "From a social standpoint dependence denotes power rather than a weakness, it involves interdependence" seeing people's growth as a product of their interconnectedness with others, Dewey emphasized the importance of the individual being both self-reliant and a presence others can depend on. Human beings thrive on mutual support and encouragement. This is the source of our humanity. With deep respect we convey our heartfelt gratitude to all who made our mission a joyful venture. There is no concern more noble or admirable than concern for the weakest section of our society.

Summary

Domestic workers mobilization programme at Saathi Centre, ISST Kalyanpuri completed its third phase in September 2012. During the third phase we included two additional areas to identify more domestic workers for mobilization programme. Our community mobilizers contacted and surveyed 300 domestic workers from Trilokpuri Block No. 2 and Khichripur Block 7-8. As we learned tremendously from the previous phases, we could gain knowledge and wisdom to initiate certain new activities to facilitate, encourage and enthuse to domestic workers create and ensure better life condition for themselves and their families.

We encountered a considerable number of domestic workers who had to leave their work and many of them took long gaps from work due to some kind of illness. These illnesses range from anemia, lower levels of hemoglobin, lung infection to tuberculosis and hypertension. It is very important to find out the factors as to why these women are compelled to leave their work temporarily or permanently. The result of a small survey done by ISST mobilizers shows the following results.

After the completion of third phase we did an informal evaluation through focused group discussions. We found 108 domestic workers reported improvement in their health status. Most of them were previously suffering from iron/calcium deficiency, general weakness (anemia), acute anemia, high sugar level, hypertension and some of them were found suffering from more serious diseases like leukoderma, STD etc. To fulfill the need and demand we not only coordinated with GRC's of the respective areas but also organized exclusive health camps and clinics to fill the gaps. Eventually we established a small centre which was named Sakhi Kendra by these women. This centre is working as health guide for all domestic workers who are associated with us and also for those who cannot regularly connect with us but need some kind of support or intervention.

Number of Self Help groups of domestic workers have been increased to 10 groups now. The accounts of these groups have been opened in nationalized banks. The members of the groups have also been trained in Para- medical skills so that they can volunteer in their Sakhi Kendra to provide services and guidance to their counterparts.

Bachpan centre has been expended with 65 more children added at Saathi Bachpan Programme. 50% of these children belong to the domestic workers families. Within a span of one and a half year we have been able to reach out to more than 250 children and an equal number of youth and adolescents. This connection has been established through different activities like life skills training, RTI workshops, theatre activities, discussion group meetings and vocational training workshops. Saathi Centre has been successfully providing them a secure, conducive and disciplined environment to learn, interact and enhance their capacities.

The staff of saathi centre has been receiving various trainings throughout the year. The trainings are conducted and planned after observing the gaps and grey areas while performing daily tasks and activities. These trainings include time utilization, checking your own behaviour and conduct, community mobilization on health issues etc

Monthly Assessment of Children:-

Monthly assessment is the activity done every month to know the pace of progress made by each student so that weak children could be given extra attention. The assessments are done not only to see their educational growth but also to examine the improvement in their behavior, personality and health. Each assessment is done very carefully by trained Bachpan staff to identify the children with special need.

After these continuous assessments it was noticed that we have more children having Dyslexia and ADHD than any other problems like autism or mental retardation. Keeping this in mind we have decided to have two exclusive training workshops for our staff on these two problems in the coming months.

Most of the youngsters were in favor of a wholesome learning experience where they can learn basic computer skills, spoken English, personality development skills, interview skills and life skills. All the students were given activities in groups to perform certain tasks using their imagination.

6. Superstition:-

Students had themselves selected this topic because they got confused due to number of things, and behaviors shown by their parents and elders that have no logical ground like they are often told by the parents that should not move or go forward if a cat crossed their way, they should also not leave for important work if somebody sneezes while they are going out. Children listed hundreds of superstitions and myths they have been told to follow. The meeting ended on a very happy and positive note as everyone felt that they knew how they could contribute to their country.

9. Crime against Women

The recent gang rape case of Nirbhaya in Delhi has shaken the young girls and boys so much that they wanted to discuss it seriously. All agreed that the whole system is responsible for these types of incidents. The blame game will not bring any change until all of us police, judiciary, politicians and public take some responsibility and do not just shed our responsibility by gossiping and criticizing others. Police is not doing its duty, judiciary is taking a long process, politicians are only encashing by taking political mileage but do we, as public are doing our duty honestly, certainly not. Everybody agreed on this point. In the end all of the

youth girls and boys took a pledge to become a responsible citizen and courageously take action wherever and whenever it is required.

Meetings with GRC's

As we are working in close collaboration with local Gender Resource Centres, we organize meetings with their staff members. The meetings focussed on strengthening the networking and support mechanism with them and also to enhance their skills along with the staff of Saathi Centre.

Community Mobilization through Songs (23.10.12)

The representatives from three GRC's were present in this meeting. These were Asha Deep Foundation from Kalyanpuri,

Krishna Foundation from Mandawli and Chetnalaya from Trilokpuri. We called a resource person Vidya Thapa from Action India to facilitate the group. Resource person not only elaborated the value of singing songs among the women, she also told them about different types of songs for different occasions. She said that if you want to change the attitude and hearts of the people then songs and plays are the most effective medium. Songs directly reach the hearts without hurting the sentiments of the people. She taught the group various songs to sensitize and motivate communities regarding girl child, dowry system, educating the girl, gender equality , violence against women etc.

Value of Time (24.12.12)

This meeting was also attended by staff of three GRC's. First of all an exercise was given to them to identify their own time wasters. Every participant made a chart of his/her own routine work in the office and identified the gaps where he/she tends to waste time on gossiping, talking over mobile or just talking with colleague etc. After the exercise, a calculation was done and it was found that everyone wastes atleast one to one and a half hour everyday and this comes to around 20 to 25 hours a month. If we utilize this time in a planned manner, this can contribute to our own growth and professional development. The time can be utilized for-

- Reading relevant material/books.
- Making charts and learning tools for children.
- Arranging our own files and papers.
- Cleaning our drawers.
- Planning next day's activities

TRAINING FOR TEACHING THE CHILDREN WITH SPECIAL NEED (CWSN)

RESOURCE PERSON :- BIPASA MUKHARJI FROM "ORKIDS"

As the teachers of Saathi centre noticed a lot of attention related problems in children, it was decided to have an exclusive training workshop on ADHD and Dyslexia. Our Bachpan staff members have been regularly visiting the government schools. They are moved by the plight and trauma of the poor children being continuously tagged as stupid, incapable, mischevious, good for nothing, impossible and the like. The training focused on the children who have symptoms of ADHD and DYSLEXIA but go unnoticed because of the unawareness of the teachers and parents. Details of the symptoms are as follows.

Attention Deficit Hyperactivity Disorder

Attention Deficit Hyperactivity Disorder is characterized by developmentally inappropriate impulsivity, inattention and in some cases hyperactivity.

ADHD is a neurobiological disorder that is more commonly diagnosed in boys than in girls.

Children with ADHD may seem less mature and responsible than their peers. They always tend to be 'on the go' and often remain restless and fidgety into adulthood. Onset of symptoms is typically seen in early childhood, before the age of 7, and often persists into adulthood and pose life long challenges.

Children with ADHD often have co-occurring problems such as school failure, problems with relationships, speech and language difficulties and various other social, emotional and behavioural disorders. There are three main types of ADHD, but they can occur together. The symptoms of the three types are :

ADHD : Predominantly inattentive type (ADD):

- **Fails to give close attention to details or makes careless mistakes**
- **Has difficulty sustaining attention**
- **Does not appear to listen**
- **Struggles to follow through on instructions**
- **Has difficulty with organization**
- **Avoids or dislikes tasks requiring sustained mental effort**
- **Loses things**
- **Is easily distracted**
- **Is forgetful in daily activities**

ADHD : Predominantly hyperactive type:

- - Fidgets with hands or feet or squirms in chair
- - Has difficulty remaining seated
- - Runs about or climbs excessively
- - Has difficulty engaging in activities quietly
- - Acts as if 'driven by a motor'
- - Talks excessively

ADHD: Predominantly impulsive type:

- - Blurts out answers before questions have been asked
- - Difficulty waiting or taking turns
- - Interrupts or intrudes upon others

Learning Disabilities

Definition

A learning disability (LD) is a neurological disorder that affects the brain's ability to receive process, store and respond to information.

What is LD?

The term learning disability is used to describe the seeming unexplained difficulty a person of at least average intelligence has in acquiring basic academic skills. These skills are essential for success at school and work, and for coping with life in general. The term learning disorder is generally used to encompass a group of disorders and not a single disorder.

The main feature of a learning disability is the distinct gap between the level of achievement (intellectual ability) that is expected and what is actually being achieved (academic performance). It generally affects a person's ability in the areas of listening, speaking, reading, writing and mathematics.

Children with LD process information differently and do not have primary sensory deficits, MR, emotional disturbances or motor handicaps.

Symptoms/Warning Signs

Preschool

- Late talking most of the time
- Pronunciation problems
- Slow vocabulary growth, often unable to find the right word
- Frequently substitutes related words eg. 'table' for 'bench'
- Difficulty rhyming words
- Likes listening to stories but shows no interest in letters and numbers
- Does not ask questions and becomes frustrated when questions are asked eg. When asked 'when is your birthday', he may answer 'eat cake'
- Cannot relate events or stories in a logical order
- Talks little during spontaneous play, answers in single words
- Trouble learning numbers, the alphabet, days of the week
- Poor ability to follow directions or routines eg. Left-right confusion
- Shows significant discrepancy between nonverbal problem solving (eg. Jigsaw puzzles, blocks), and ability to communicate using words

Grades 1-4

- Puzzling discrepancy between intelligence and written language
- Slow to learn the connection between letters and sounds
- Confuses basic words (eg. Run, eat, want)
- Makes consistent reading and spelling errors including letter reversals (b/d), inversions (m/w), transpositions (felt/left) and substitutions (house/home)
- Transposes number sequences and confuses arithmetic signs (+, -, x, /, =)

- Slow to learn new skills, relies heavily on memorization
- Difficulty sequencing, planning and organizing writing
- Bizarre spelling errors eg. `wyt' for `wait', `kss' for 'snake'.

- Dyslexia is a form of learning disability.

ONE DAY PARAMEDICAL TRAINING FOR THE STAFF AND VOLUNTEERS

23rd March-2013

Paramedical training for staff and volunteers was conducted on 23rd March-2013 from 10:00am to 5:00pm at Saathi centre, police station, Kalyanpuri Delh. The aim of the workshop was to understand and learn about the first aid which must be provided for a variety of ailments. The purpose of organizing the training for the staff and volunteers was to empower them with first hand information about taking immediate measures in case of medical emergencies, which are likely to occur in slum communities more often. The information gained by the staff can be disseminated gradually to the pressure groups and other groups of domestic workers.

3. A doctor should be contacted to have the bone set back into its socket.

Head Injuries

A sharp blow to the head could result in a concussion, a jostling of the brain inside its protective, bony covering. A more serious head injury may result in contusions, or bruises to the brain.

WHAT HAVE WE LEARNED

During these two years of domestic workers mobilization programme, we learned tremendously from our problems and obstacles and found out that obstacles are only opportunities to go to the right direction and problems are spring boards to success. We used Right to Information as a tool not as a weapon, which resulted in a more harmonious relationship with Police and other people in authority. We also learned that being assertive (not aggressive) always pays. With this kind of endeavour we were invited to conduct three gender sensitization workshops for police officials and provided with more space to setup a separate library. We wish to sensitize more police officials in future.

WHAT IS IN STORE

- Organizing domestic workers in different areas and providing them with identification cards of organization.
- Training and preparing them for unionization.
- Exposure Visit of domestic worker's group to the places where unions exist.
- Facilitating crèche services to small children of domestic workers.
- Organizing public hearing (Jan Sunwai) for various problems faced by them.
- Strengthening the Youth group and starting a wall-newspaper for the community.
- Innovative evaluations system for bachpan programme by making a chart of strengths and weaknesses and working on these two aspects.
- Extending the bachpan programme to government M.C.D schools to reach out to more needy children (C.W.S.N).
